CHAPTER I
INTRODUCTION

A. Background Of The Problem

The nature of education is the maturation process quality of life. A human is able to understand what the meaning and the nature of life, for what and how to solve the tasks of life reality and correctly. Because of that, the focus of education are formatted for developing an excellent personality, with are the focus point are logical quality, heart, morals, and faith. The goals of education what is achieved the perfection of quality life. Therefore, by the exists of education do hope that someone can be own self and able to dig the potential. The education can make someone grow the talents, personalities, and abilities.

The aims of education according to Act Of The Republic Of Indonesia Number 20, the Year 2003 On National Education System, The National Education function to develop the capability, character, and civilization of the nation for enhancing is intellectual capacity, and is aimed at developing learners potentials so, they become persons imbued with human values who are faithful and pious to one and only God; who possess morals and noble character; who are healthy, knowledgeable, competent, creative, independent; and as citizens, are democratic and responsible.

In this context, the aims of education is guiding, leading, and directing of the way for learners, so they have been growing in accordance with potential and

---
the real of life concept, so they become maturity of life, potency, and the real concept of life in the future of life will full of challenge and change. Therefore, education is needed to develop the ability to think and form a good character and love homeland.

The other of the aims and function of education, and now the education world was affected by globalization and modernization, in this global era, the consequent of the educational program should be able to adapt in a modern context. The main challenge is confronted with changes is very quick, it is the truth about the nature of humanity are reluctant to change, in fact from a human is hampering of change the motion. Whereas the nature of change is beginning all of improvement and progress.

Education world in globalization era, should be able to shape learners which have excellent in science knowledge and skills so, learners can compete in the modern era. Because, the competition in the future will be tighter and not just knowledge but ability or skills will be needed also. Therefore, it is time for the education system to adapt to the progress of time.

The current globalization and modernization it is very quickly for changes should be wisely. Human must have two competition to prepare of modernization impacts, namely science and technology and value of religious spirituality of faith and piety. A weakness for one of these competencies has made the development of learners is not balanced, in the end, will produce a split

---

3 Dedi Mulyasa, _Pendidikan Bermutu dan Berdaya Saing_ …… p. 5.
personality. Therefore, learners who have a potential of science and technology, and faith and piety must be internalized and developed. In the end, globalization and modernization will be implicated in the guidance and prospect society about education can develop potential academic, science and technology, and religious value.\(^6\)

The impact of globalization on science and technology with sophisticated information and telecommunication resulting in this world is becoming narrower. What is happened of the world be able to learn quickly by children and adolescent in this time, even though they just silence in the house.

Supported by the internet, that can use for positive things, for example, to search for science and good information, it is right. But, many people use the internet to search not a good picture or negative information.

This is the negative impact of globalization on learners at this time. Bad moral, inappropriate behavior, bad character, fight and other negative activity.\(^7\)

So, technological advances in the globalization domain are very influential for children and adolescent at this time.

Globalization and technology advances give appear phenomena, an example is phenomena “Kids Jaman Now” or kids in this era. These phenomena are tinged with juvenile delinquency, relationship and things of hits right now and things are negative and no accordance with the norms. Because the growth of

---

technology is faster in this era and technology used is not for positive things but negative things.

So, character education is very important for children in this era, then can obedient the norms and have akhlakul karimahas well as knowledgeable.

The prophet Muhammad Sallallahulaihiwasallamsaid the purpose of the messenger by Allah SWT is none other to improve morals. Abu Hurayrah narrated that is the prophet Muhammad Sallallahulaihiwasallamsaid:

إِنَّمَا بُعِثْتُ لأُتَمِّمَ مَكَارِمَ الأَخْلاَقِ

“Actually, I sent by God to improve the noble morals of his Majesty.” (Narrated by Ahmad; classed as Saheeh in ash-Shahihah No. 45).

Education character can be taught withan Islamic education system because the mind pointof Islamic education is education character was called by moral education. Though Islamic education, learners can learn about morals so, knowing about good morals and bad morals, and can apply for every day. By knowing this thing so, learners can use the technology positively.

Islamic education hoped to produce a human which always try to improve faith, piety, and noble moral as like ethics, manners, or norms as the realization of education. The human becomes stronger to confront challenges, obstacles, and changes appear in the association society in the scope of local, national, regional and global.

---

To achieve the aims of Islamic education, it needs a good system. The system can controlled learners in the daily activities so, learners can be controlled well. And the aims of Islamic education can be achieved.

The full day learning system is a learning system was implemented during a full day in school and Islamic boarding school. In the full day learning system, the process of learning activities is not just in the school but, in the Islamic boarding school also. Islamic Junior High School Andalusia Kebasen is one of school use a full day learning system.

Islamic Junior High School Andalusia Kebasen use full day learning system, where the learning process will start at 07:00 am until 04:00 pm. Learning activities in the school conduct at 4 hours and learning activities in the madrasah diniyah conduct at 2 hours. Before beginning the lesson, the student of Islamic Junior High School Andalusia Kebasen must pray dhuhawith a teacher there.

Islamic Junior High School Andalusia Kebasen is the formal and the learning process of Islamic education has related with Islamic Boarding School At-Taujeih Al-Islamy 2 leler used the real boarding school which found by K.H. Zuhruul Anam Hisyam. Learning activities of Islamic education are not just implemented in the school but in Islamic boarding school also namely madrasah diniyah. All of the students must stay in Islamic boarding school because there is interrelated between learning activities of Islamic education in the school and Islamic boarding school.

Not just for related learning system but, school and Islamic boarding school has related about assessment result about learning of Islamic
education with any kinds of material in Islamic Boarding School At-Taujieh Al-Islamy 2 Leler will have an effect in the assessment result of Islamic education in Islamic Junior High School Andalusia Kebasen.

Character education in the Islamic education in Islamic Junior High School Andalusia Kebasen learners follow teachers and Ustāż-ustāžā attitudes, especially morals of K.H. Zuhrul Anam Hisyam and Family.  

So, Islamic education in Islamic Junior High School Andalusia Kebasen is very good, supported by learning activities in Islamic Boarding School At-Taujieh Al-Islamy 2 which have to apply the attitude of discipline in daily activities. Therefore, the researcher would like to research about “Learning Process of Islamic Education in the Full Day Learning System in Islamic Junior High School Andalusia Kebasen, Banyumas Regency”.

B. Operational Definition

1. Learning

Learning is an activity or the process of acquiring knowledge, improve skill, behaviors, values, attitude, and good personality. In the contents, the process of obtaining knowledge, according to the conventional scientific understanding of human contact with nature is termed with the experience.  

---

11 Result of Observation in 23th of September 2017 at 10:00 AM in Andalusia Junior High School Kebasen with Mr. Ali Ma’sum as Teacher of Islamic Education.

2. Islamic Education

There are two definitions of Islamic education, those are: first, Islamic education is the education activities organized with desire and intention to implicated result for learning and Islamic value. Second, Islamic education is education system developed and energized or imbued by the result for learning and Islamic value.¹³
